

商品樣張

商品名稱	擠痘痘玩具
材質	玩偶(矽膠)、針頭(筒)(金屬/塑膠)
照片	 The image consists of two side-by-side black and white photographs. Both photographs show a person's hand holding a small, light-colored doll with a large, round head. The doll has a visible pimple on its forehead. A syringe-like tool, which is part of the 'pimple-squeezing toy', is being used to press against the pimple. The tool has a long, thin needle-like tip. The background is a textured, light-colored surface, possibly a bedsheet or a tablecloth.
